Gear Selection

(Creating Concrete Goals Towards Career Goals)

Different driving conditions require different gears.

Choose a current goal and move/draw the gearstick to the position that represents the approach you need right now.

- *Does this goal require more torque or more speed?*
- *Are you trying to start in too high a gear?*
- *Would shifting down make the next stage more manageable?*
- *What would tell you it is time to shift up?*
- *What gear does this goal need from you right now?*
